Harnessing the Healing Power of Art

THE ART OF HEALING

MIND • BODY • SOUL

The hospital environment can be stressful, even for the bravest. When we navigate healthcare facilities, we often anticipate pain, suffering, and a sense of dread. In many hospitals, stark walls, bare floors, and unadorned furniture leave patients, visitors, and staff without a space that offers rest, beauty or peace.

At CTP, our mission is to harness the healing power of art. In healthcare settings, there is a profound need for additional support and care, and art reaches the mind, body and soul both directly and in subtle yet powerful ways.

Exciting developments are underway; leading healthcare facilities have recognized that integrating art into their buildings significantly enhances patient recovery and overall wellness.

Hospitals have seen remarkable results, not only do patients heal faster, but the atmosphere uplifts visitors, physicians, and staff. Art creates a sense of care that is felt by everyone. In addition it makes economic sense to cultivate an environment where the art, the architecture and the interior work in harmony towards healing.

CTP aims to bring this innovative and holistic concept to the Middle East, with the focus on showcasing regional and local artists whose work has the power to transform healthcare environments.

We look forward to connecting and learning more about your projects to explore how we can support your vision.

Thank you for considering this important partnership.

Why Choose Cade Tompkins Projects

- Both partners with 40+ years of experience in the art world
- Full service bespoke art company
- Successfully accomplished projects with budgets up to \$20 million
- IFPDA (International Fine Print Dealers Association) member 2015
- American Society of Appraisers Certification
- The System for Award Management (SAM) Clearance
- Dun & Bradstreet D-U-N-S® Number
- Diverse-owned business
- Strong connections with 700+ local, regional, and international artists
- Our projects promote the UAE's cultural growth and development

I'm a chaplain on the staff of Memorial Sloan Kettering Cancer Center in New York. I joined MSK in 2017 and I've worked at their David H. Koch Center for Cancer Care on East 74th Street since it opened in January 2020. James Sundquist's "Synapse" hangs prominently on our 15th floor, where over 200 patients receive chemo and other infusion therapy every day.

I spend most of my day seeing patients on "K15," and that painting gives me (and many nurses and patients) much joy each time we see it (which is a lot!) The colors used and the energy of the work helps many, and especially me, get through some hard days with a little more hope and even joy.

Thank you for bringing life into an often challenging place through the gift of art.

*All my best,
Brian K.*
